

Notes from the Field

1. Which plant did your garden pests feed off of the most? Every garden needs a sacrificial sprouter to keep pests away from your main grows. Note what kind of pests deterrents you used to learn exactly what worked from this season.

2. What was the average temperature in your area during this growing season? _____
What about the percentage of sunny days to summer storms? How about the humidity?

3. Which seed varieties did you plant this year and where? Compose a garden map and rotate seed types, never planting the same type in the same space in back to back growing seasons.

Use this space to compose your garden map.
